

RESPECT

Respect for others begins with respect for oneself.
Self-respect implicitly means earning respect.

Getting respect also means getting respect for your language.

Getting respect also means getting respect for your culture.

Getting respect also means getting respect for your identity.

Getting respect also means getting respect for your roots.

Getting respect also means getting respect for your values.

Getting respect also means getting respect for your history.

Getting respect also means getting respect for your ancestors.

Getting respect also means getting respect for your distinction.

Getting respect also means getting respect for your **uniqueness**.

Remember that you not only have the right
to be **unique**, but also the obligation.

Eleanor Roosevelt (1884 - 1962)

We must fear the **homogenization** of the human race
Norman Mailer (1923 - 2007)

Homogenization is the hidden goal of **uncontrolled illegal immigration**.

Homogenization is the hidden goal of the **transgender chimera**.

To fight against the **homogenization** of the human species is to fight
against those who want to destroy the diversity of Western civilization with
its **most advanced** musical tradition.
